

A baler picks up the straw and makes big square bales

A dung spreader throws the dung onto the fields to help the plants grow

A feed wagon mixes up animal food before feeding the livestock

A liquid manure sprayer can be filled with slurry for spraying on the fields

A large red pea harvester is shown in a field, harvesting peas. The machine has a large cab and a long body with multiple rows of harvesting mechanisms. It is moving through a green pea crop under a blue sky with scattered white clouds.

A pea harvester cuts the pea crop and separates the peas from the pea plant

A red tractor is pulling a large metal plough through a field, turning over dark, rich soil. The tractor is a John Deere 8600, and the plough has several large, curved blades. In the background, another tractor is visible, and the horizon shows a line of trees and distant hills under a blue sky with white clouds.

A plough turns over the soil before new crops are planted

A quad bike is a really useful tool for moving round the farm

The wheels on a machinery seeder fold down so the seeds can be planted in the ground

Tractors have onboard computers linked to satellite technology

A robot that sweeps up cow dung

A crop sprayer with long arms

Planting peas with caterpillar tracks on the wheels to help the soil

Tractors and trailers ready to catch the grain

A robot that milks the cows
