Geographical skills tasks:

Using the information in the table below, complete the following tasks:

1. Create a horizontal bar chart showing exporters and importers of sugar.
2. Create a vertical bar chart to show the amounts of sugar consumed by the top ten countries.
3. Create three maps to show the exporters, importers and consumers of sugar.

Describe your data presentation:

For each of these forms of data presentation, try to describe the trends identified. You could use the following structure to help:

- General pattern
- Highest value
- Lowest value
- Any anomalies?
- Always quote in detail!

Here are some good key words to help describe the patterns identified:

- Domestic – produced and consumed in home country
- Commercial producing regions for export – are there groups of countries clustered together?

Exporters		Importers		Consumers	
Country	Amount (millions tonnes)	Country	Amount (million tonnes)	Country	Amount (grams per person per day)
Brazil	24.4	China	6.0	USA	126.4
Thailand	7.8	Indonesia	3.6	Germany	102.9
Australia	3.7	EU	3.0	The Netherlands	102.5
India	3.0	USA	3.0	Ireland	96.7
Guatemala	2.3	UAE	2.5	Australia	95.6
EU	1.5	Bangladesh	2.3	Belgium	95.0
Mexico	1.28	Malaysia	2.0	UK	93.2
Cuba	0.95	South Korea	1.9	Mexico	92.5
Colombia	0.6	Algeria	1.9	Finland	91.5
UAE	0.23	Nigeria	1.5	Canada	89.1
